# Chiara Lo Prete

ASSISTANT PROFESSOR OF ENERGY ECONOMICS

Scuola Superiore Sant'Anna | Pisa,  
**Aula 3**  
**19 November 2018**  
**14:00-15:00**

Dr. Lo Prete (<https://www.eme.psu.edu/faculty/lo-prete>) is looking for motivated students with a background in economics, statistics and optimization, who would already have (or are about to complete) a Master's degree, and are interested in conducting interdisciplinary research in energy economics. Particular areas of interest include power and natural gas system resiliency and economics, and impacts of wind generation on transmission systems. Students would be part of an expanding research group that focuses on electricity market design and impacts of environmental policies on electricity markets. The Energy and Mineral Engineering Department at Penn State is interdisciplinary (<https://www.eme.psu.edu/research>), and the university has many experts in energy systems (<http://www.iee.psu.edu/>). Students who are interested in a Ph.D. in the EME Department may contact Chiara Lo Prete directly at [chiaraloprete@psu.edu](mailto:chiaraloprete@psu.edu) with their resume, graduate and undergraduate transcripts and GRE/TOEFL scores.
